

Screening

(acc. to international medical guidelines)

Annual set of analyses without medical recommendation*

Classic Papanicolau test / PSA	included 1/yr
Urinalysis	included 1/yr
Blood glucose	included 1/yr
LDL cholesterol	included 1/yr
HDL cholesterol	included 1/yr
Triglycerides	included 1/yr
Complete blood count	included 1/yr
ESR	included 1/yr
Transaminases (TGO, TGP)	included 1/yr
Serum creatinine	included 1/yr
Total cholesterol	included 1/yr

* For laboratory investigations that are included with a limit (1 / year, 2 / year), the limit applies from the moment the patient accesses the service, not from the time of signing the contract.

Emergency Medicine

Hotline Medical** - 24/7 included

Emergency Rooms*

Euroclinic Hospital: Mon. - Sun., 08:00 - 20:00	50% disc.
Ponderas Academic Hospital: 24/7	50% disc.
Brasov Hospital: 24/7	50% disc.
Cluj Hospital: 24/7	50% disc.

Obstetrics-Gynecology

Emergency Room*

Baneasa Hospital: 24/7	50% disc.
Brasov Hospital: 24/7	50% disc.

* The discount refers to the checkup in the Emergency Room. Used medical supplies and medication are not included in the Emergency Rooms. Laboratory analyses performed as an emergency benefit from a discount according to the subscription, except for imaging services, where the applicable discount is 50%.

** Medical advice by telephone in case of an emergency - 24/7. Hotline Medical - 021 9942.

Laboratory analyses

Departments* (more than 300 indicators)

Bacteriology	} 100% discount according to Analyses Annex with recommendation from RM physician
Biochemistry	
Electrophoresis	
Electrolytes	
Enzymes	
Urine examination	
Hematology	
Hemostasis and coagulation	
Hormones	
Immunology	
Tumor/infection markers	
Viral markers	
Parasitology	
Papanicolau in liquid medium	
Drug testing	20% discount
COVID-19 testing, PCR and antibodies	20% discount

* One department includes several types of tests; the discount is granted to the investigations included in the Laboratory Analyses Annex. Analyses not included in the Annex will be fully paid.

Medical specialties

consultations and medical check-ups

General and Internal Medicine

checkup / examination 100% discount

Issuance of certificates / medical certificates**

included

Issuance of prenuptial certificates**

included

Nutrition	1 session included, the remaining with 50% disc.
Psychology / Psychotherapy	20% discount
Genetics	20% discount
Neurosurgery	40% discount

100% discount for the following specialties

Allergology and clinical immunology	Obstetrics – Gynecology
Infectious diseases	Ophthalmology
Cardiology	Oncology
General surgery	ENT
Dermatology	Orthopedics and traumatology
Diabetes and metabolic diseases	Pneumophtisiology
Endocrinology	Psychiatry
Gastroenterology	Medical recovery
Hematology	Rheumatology
Nephrology	Urology
Neurology	

* The subscription offers direct access to the medical specialties listed in this annex. If the subscriber wants to access medical services with a specific physician or in a specific location, additional costs may be charged, depending on the subscription and discounts he/she holds.

** The issuance of medical certificate is subject to a prior checkup.

** The auto papers are not included; the issuance of the certificate is subject to a prior checkup.

Imaging and other medical investigations

Radiology	100% disc.	Dermatological investigations	100% disc.
Ortho-spine	100% disc.	Dermatological procedures (cautery, excisions)	100% disc.
Ortho-leg	100% disc.	Dermatological procedures (biopsies)	20% disc.
Hysterosalpingography	50% disc.	Upper and lower digestive endoscopy	100% disc.
Classic/digital mammography	100% disc.	ENT endoscopy	100% disc.
Osteodensitometry	100% disc.	Fibroscope	100% disc.
CT	100% disc.	Rectosigmoidoscopy	100% disc.
MRI	20% disc.	Ophthalmoscopy	100% disc.
2D, 3D & 4D ultrasound* (except for pregnancy ultrasounds)	100% disc.	Audiometry	100% disc.
2D, 3D & 4D pregnancy ultrasound*	80% disc.	Simple spirometry	100% disc.
Doppler ultrasound	100% disc.	Spirometry with bronchodilator test	100% disc.
Barium enema	70% disc.	Colposcopy	100% disc.
Urography	70% disc.	Prick skin allergic tests	100% disc.
EKG / stress EKG	100% disc.	Simple EEG	100% disc.
Holter EKG / Holter BP	100% disc.	Prescription of eye glasses	100% disc.
Microsurgery procedures	100% disc.		

* The supplement for twin or multiple pregnancies will be fully paid

Servicii speciale

Access to all the physicians within the network (renowned physicians, university professors)	Included access according to subscription	One Day Checkup Package	20% disc.
Central Bank of Stem Cells	10% disc.	Physiotherapy / Kinetotherapy (procedures)	20% disc.
Gymnastics for pregnant women	20% disc.	Birth packages: Basic package	5% disc.

Hospitalization and surgical interventions**

	Discount:
Euroclinic minimally invasive video-assisted surgery hospital	surgical interventions – 15% / hospitalization – 10%
Baneasa Hospital - gynecology surgical interventions and hospitalization	surgical interventions – 15% / hospitalization – 10%
Bacau Medical Campus - daytime hospitalization	10%
REGINA MARIA Brasov Hospital - gynecology surgical interventions and hospitalization	surgical interventions – 10% / hospitalization – 5%
REGINA MARIA Cluj Hospital	surgical interventions – 5% / hospitalization – 5%
Timisoara PREMIÈRE Hospital - gynecology surgical interventions and hospitalization	surgical interventions – 10% / hospitalization – 10%

**Discounts for hospitalization and surgical interventions may be accessed after a minimum contracting period of three months. Discounts for hospitalization and surgical interventions do not apply to medication, medical supplies, and interdisciplinary consultations. For more details concerning inclusions and invoiceable services, please contact the admissions office. For consultations and medical investigations required during hospitalization, the above mentioned discount for hospitalization is granted, and not the one corresponding to the subscription. Discounts for hospitalization and surgical interventions do not add up.

**Discounts for surgical interventions apply to a predefined annex which is attached to this offer.

Own Polyclinics

The subscription also gives you access to more than 310 partner clinics across the country.
The full list may be found here: <https://www.reginamaria.ro/clinici-partener>

Ponderas Academic Hospital

Services in Ponderas Academic Hospital may be accessed with **20% discount**.
Medical services related to Orthopedics are included, according to the subscription.

Oana Nicolau Psychotherapy Clinic

Services in Oana Nicolau Psychotherapy Clinic may be accessed with **20% discount**.

Medical analysis points

Bucharest, Buzau, Bacau, Brasov, Calarasi, Craiova, Cluj, Constanta, Iasi, Pitesti, Ploiesti, Sibiu, Timisoara. Access with **20% discount**.
Details on <https://www.reginamaria.ro/laborator/locatii-recoltare-analize>

Pregnancy

All services included in the subscription, for free or discounted, may also be accessed during pregnancy

Dentistry

1 checkup, 1 brushing and 1 descaling for free/year, up to **20% discount** for other services except for orthodontics and implantology through partner clinics. Full list of partner dental clinics: <https://www.reginamaria.ro/node/11536>

Note: The price of subscriptions is expressed in RON / person / month. The payment of the subscription will be performed in advance, quarterly / half-yearly / annually. All the investigations 100% included in these subscriptions may be accessed with referral note from any physician, within or outside REGINA MARIA Network. The remaining services in the subscription remain unchanged.
The subscription is nominal, non-transferable and it is addressed to persons aged between 18 and 65 years.
Services which are not listed in this Annex or in the detailed annexes thereto will be fully paid according to the prices in force at the time of accessing them. List of standard prices for medical investigations, depending on location: <https://www.reginamaria.ro/clinici>

Laboratory Analyses Annex

Anti-Blood Group A Ab	Cholinesterase (CHE)	Mycological examination of product coming from purulent collection
Anti-Blood Group B Ab	Leukocyte concentrate	Mycological examination of purulent collection antifungigram
Anti-Nuclear Ab (ANA) qualitative test (ANA)	Coprocytogram	Examination of product coming from purulent collection (mycological, antifungigram if required)
Anti-Rh Ab (D)	Stool culture with antibiogram if required	Examination of product coming from purulent collection (microscopic, bacteriological, antibiogram if required)
Anti-Epstein Barr VCA IgG Ab	Stool culture antibiogram	Bacteriological examination of product coming from purulent collection
Anti-Epstein Barr VCA IgM Ab	Stool culture	Microscopic examination of product coming from purulent collection
Urinary hippuric acid	Cortisol (serum) (CORT)	Examination of product coming from purulent collection antibiogram (if required)
Uric acid (serum)	Creatinine (serum)	Examination of product coming from purulent collection (microscopic, bacteriological, mycological, antibiogram, antifungigram if required)
Uric acid (urine)	Creatinine (urine)	Examination of lingual scraping (microscopic, mycological, antifungigram if required)
AFP (alpha 1 fetoprotein)	Cryoglobulines	Microscopic examination of lingual scraping
Albumin (serum)	TIBC - Total Iron-Binding Capacity	Mycological examination of lingual scraping
Urinary albumin	Determination of Rh factor (D)	Examination of lingual scraping antifungigram (if required)
Alpha1 antitrypsin (AAT)	Determination of blood group (A,B,O)	Examination of cervix secretion (bacteriological, mycological, antibiogram, antifungigram if required)
Amylase (serum)	Hemoglobin electrophoresis (HEL)	Bacteriological examination of cervix secretion
Amylase (urine)	Lipoprotein electrophoresis	Mycological examination of cervix secretion
Ammonia	Serum protein electrophoresis	Examination of cervix secretion antifungigram (if required)
Anal print	Estradiol	Examination of cervix secretion antibiogram (if required)
Angiotensin convertase (ACE)	Unconjugated estriol	Bacteriological examination of mammary secretion
ANTI TPO	Cytological examination of blood smear	Mycological examination of mammary secretion
Streptococcus pneumoniae antibiogram	Mycological examination of other biological products	Examination of sputum (microscopic, mycological, antifungigram if required)
Cervix secretion Chlamydia antigen	Mycological examination of other products antifungigram	Microscopic examination of sputum
Urethra secretion Chlamydia antigen	Examination of other biological products (microscopic, bacteriological, antibiogram if required)	Mycological examination of sputum antifungigram (if required)
Urine Chlamydia antigen	Microscopic examination of other biological products	Examination of sputum (microscopic, bacteriological, antibiogram if required)
Other secretions Chlamydia antigen	Bacteriological examination of other biological products	Bacteriological examination of sputum secretion
Giardia antigen (faeces)	Other biological products antibiogram	Examination of sputum antibiogram (if required)
Apolipoprotein A1	Examination of other biological products (microscopic, bacteriological, mycological, antibiogram, antifungigram if required)	Examination of sputum (microscopic, mycological, antifungigram if required)
Apolipoprotein B	Coproparasitological examination (I)	Microscopic examination of sputum
APTT (Activated partial thromboplastin time)	Coproparasitological examination (II)	Mycological examination of sputum antifungigram (if required)
ASLO quantitative test	Coproparasitological examination (III)	Examination of sputum (microscopic, bacteriological, antibiogram if required)
Beta hCG	Examination of puncture fluids (microscopic, bacteriological, antibiogram if required)	Bacteriological examination of sputum
Direct bilirubin	Microscopic examination of puncture fluids	Examination of sputum antibiogram (if required)
Indirect bilirubin	Bacteriological examination of puncture fluids	Examination of sputum (microscopic, bacteriological, mycological, antifungigram if required)
Total bilirubin	Examination of puncture fluids antibiogram (if required)	Microscopic examination of sputum
C3 (Complement C3)	Examination of puncture fluids (microscopic, bacteriological, mycological, antibiogram, antifungigram if required)	Mycological examination of sputum antifungigram (if required)
C4 (Complement C4)	Mycological examination of puncture fluids	Examination of sputum (microscopic, bacteriological, antibiogram if required)
CA 125 (ovary, bile ducts)	Mycological examination of puncture fluids antifungigram	Bacteriological examination of sputum
CA 15 / 3 (mammary gland)	Examination of puncture fluids (microscopic, mycological, antifungigram if required)	Examination of sputum antibiogram (if required)
CA 19 /9 (pancreas, esophagus, rectum)	Microscopic examination of dermatophytes	Examination of sputum (microscopic, bacteriological, antibiogram if required)
Calcitonin (CALCI)	Microscopic examination of pharyngeal exudate for fusospirili	Bacteriological examination of sputum
Calcium (urine)	Microscopic examination on puncture fluids smear	Examination of sputum antibiogram (if required)
Calcium (serum)	Microscopic examination of nasal secretion for eosinophils	Examination of sputum (microscopic, bacteriological, mycological, antibiogram, antifungigram if required)
Ionic calcium (serum)	Conventional Papanicolau examination	
Serum calcium		
CEA (carcinoembriogenic antigen)		
Lupus cells (latex)		
Chlamydia trachomatis IgA Ab		
Chlamydia trachomatis IgG Ab		
CIC (Circulating immune complexes) (C1QBI)		
CK (Creatin phospho kinase)		
CK MB (Creatin kinase MB isoenzyme)		
Ionogram (sodium, potassium, chlorine)		
Chlorine (serum)		
Chlorine other fluids		
Chlorine (urine)		
CMV (Cytomegalovirus) IgG Ab		
CMV (Cytomegalovirus) IgM Ab		
Total cholesterol		

Laboratory Analyses Annex

Pharyngeal exudate (bacteriological, antibiogram if required)	LDH (Lactate dehydrogenase) in CSF (cerebrospinal fluid)	Eye secretion (microscopic, bacteriological, antibiogram if required)
Bacteriological examination of pharyngeal exudate	LDH other fluids	Eye secretion microscopic
Pharyngeal exudate antibiogram (if required)	LDL cholesterol	Eye secretion antibiogram (if required)
Pharyngeal exudate (bacteriological, mycological, antibiogram, antifungigram if required)	LH (luteinizing hormone)	Bacteriological examination of eye secretion
Pharyngeal exudate (mycological, antifungigram if required)	Lipase (LIPA)	Eye secretion (microscopic, bacteriological, mycological, antibiogram, antifungigram if required)
Mycological examination of pharyngeal exudate	Total lipids	Eye secretion (microscopic, mycological, antifungigram if required)
Pharyngeal exudate antifungigram (if required)	Listeria monocytogenes total Ab (LISK)	Mycological examination of eye secretion
Nasal exudate (bacteriological, antibiogram if required)	Lithium (serum) (LI)	Eye secretion antifungigram (if required)
Bacteriological examination of nasal exudate	Magnesium (serum)	Ear secretion (microscopic, bacteriological, antibiogram if required)
Nasal exudate antibiogram (if required)	Magnesium (urine)	Ear secretion (microscopic, mycological, bacteriological, antibiogram, antifungigram if required)
Fibrinogen	Sampling maneuver	Microscopic examination of ear secretion
Iron (serum)	Microalbuminuria	Bacteriological examination of ear secretion
Prostatic acid phosphatase	Mycoplasma hominis / Ureaplasma urealyticum (culture, identification, antibiogram if required)	Ear secretion antibiogram (if required)
Total acid phosphatase	Mycoplasma hominis / Ureaplasma urealyticum culture	Ear secretion (microscopic, mycological, antifungigram if required)
Alkaline phosphatase	Mycoplasma hominis / Ureaplasma urealyticum identification	Mycological examination of ear secretion
Phosphorus (serum)	Mycoplasma hominis / Ureaplasma urealyticum antibiogram (if required)	Ear secretion antifungigram (if required)
Phosphorus (urine)	Serum osmolarity	Balanopreputial groove secretion (microscopic, bacteriological, antibiogram if required)
RF (rheumatoid factor) quantitative test	Urinary osmolarity	Balanopreputial groove secretion (microscopic, bacteriological, mycological, antibiogram, antifungigram if required)
RF (rheumatoid factor) Waaler Rose reaction	PAPP A (pregnancy-associated plasma protein)	Microscopic examination of balanopreputial groove secretion
Free T3	CRP (C reactive protein) quantitative test	Bacteriological examination of balanopreputial groove secretion
Free T4	Faeces PH	Balanopreputial groove secretion (microscopic, bacteriological, mycological, antibiogram, antifungigram if required)
FSH (follicular stimulating hormone)	Potassium (serum)	Microscopic examination of balanopreputial groove secretion
GGT (Gama glutamyl transferase)	Potassium (urine)	Bacteriological examination of balanopreputial groove secretion
Glucose (serum)	Digestion test (faeces)	Balanopreputial groove secretion antifungigram (if required)
Glucose (other fluids)	Lipid profile (cholesterol, HDL, LDL cholesterol, triglycerides)	Mycological examination of balanopreputial groove secretion
Glucose (urine)	Progesterone	Examination of balanopreputial groove antifungigram
HAV IgM Ab	Prolactin	Balanopreputial groove secretion (microscopic, mycological, antifungigram if required)
HAV total Ab	Total proteins (serum)	Urethral secretion (microscopic, bacteriological, antibiogram if required)
HBc IgM Ab (AHBCM)	Total proteins (urine)	Urethral secretion microscopic
HBc total Ab	Total proteins other fluids	Bacteriological examination of urethral secretion
HBe Ab (AHBE)	PSA (prostate specific Ag)	Mycological examination of urethral secretion
Hbe Ag	Rubella IgG Ab	Urethral secretion antibiogram
HBs Ab	Rubella IgM Ab	Urethral secretion antifungigram
HBs Ag	BLSE screening	Urethral secretion (microscopic, mycological, antifungigram if required)
HCG (human chorionic gonadotropin)	Gestational diabetes screening	Vaginal secretion (smear)
HCG + beta subunit	MRSA screening	Bacteriological examination of vaginal secretion
HCV Ab	Genital secretion (smear and culture)	
HDL Cholesterol	Genital secretion smear	
HDV Ag	Genital secretion culture	
Helicobacter pylori IgG Ab / quantitative test	Mammary secretion (bacteriological, mycological, antibiogram, antifungigram if required)	
Glycosylated hemoglobin / HbA1c	Mycological examination of mammary secretion	
Complete blood count	Bacteriological examination of mammary secretion	
Occult bleeding /Adler test (faeces)	Mammary secretion antibiogram	
HIV (1/2) / Ab	Mammary secretion antifungigram (if required)	
Immunoglobulin A	Nasal secretion (smear)	
Immunoglobulin E		
Immunoglobulin G		
Immunoglobulin M		
LDH (Lactate dehydrogenase)		

Laboratory Analyses Annex

Vaginal secretion antibiogram	Toxoplasma Gondii IgG Ab	Urine culture fungal culture
Vaginal secretion (microscopic, bacteriological, mycological, antibiogram, antifungigram if required)	Toxoplasma Gondii IgM Ab	Urine culture antifungigram
Mycological examination of vaginal secretion	Toxoplasma Gondii IgG avidity index (TAVGE)	Bronchial secretion - bacterial culture
Vaginal secretion antifungigram	TPHA qualitative test	Bronchial secretion - antibiogram
Vaginal secretion (microscopic, mycological, antifungigram if required)	TPHA quantitative test	Bronchial secretion - fungal culture
Vulvar secretion (smear)	Triglycerides	Bronchial secretion (bacterial culture, fungal culture, antifungigram, antibiogram if required)
Syphilis serology RPR qualitative test	TSH (thyroid stimulating hormone)	Bronchial secretion bacterial culture, antibiogram if required
Sodium (serum)	TTGO 75g glucose powder	Bronchial secretion fungal culture, antifungigram if required
Sodium (urine)	TTGO glucose tolerance test with 2 levels of blood glucose	Bronchial secretion - antifungigram
Sperm culture (with antibiogram if required)	TTGO glucose tolerance test with 4 levels of blood glucose	Bronchoalveolar lavage - bacterial culture
Sperm culture	TTGO glucose tolerance test with 5 levels of blood glucose	Bronchoalveolar lavage - fungal culture
Sperm culture antibiogram	Urea (serum)	Bronchoalveolar lavage - antibiogram
Urinalysis	Urea (urine)	Bronchoalveolar lavage - antifungigram
Urinary sediment	VLDL Cholesterol	Bronchial aspirate bacterial culture
Urinalysis and sediment	ESR (erythrocyte sedimentation rate)	Bronchial aspirate fungal culture
Total T3 (tri-iodothyronine)	Urine culture with antibiogram (if required)	Bronchial aspirate antibiogram
Total T4 (thyroxine)	Urine culture	Bronchial aspirate antifungigram
Total testosterone	Urine culture antibiogram	Tracheal secretion bacterial culture
COVID-19 tests, PCR and antibodies	Native microscopic examination of urine culture	Tracheal secretion fungal culture
TGO (ASAT / AST)	Stained microscopic examination of urine culture	Tracheal secretion antibiogram
TGP (ALAT / ALT)		Tracheal secretion antifungigram
Prothrombin time (Quick time) (PT, AP, INR)		

The discount for laboratory analyses listed above is offered according to the medical services subscription mentioned in the Subscription Annex. Discount is offered exclusively for the Double test by the classic method (Prisca); the other methods are paid at list price

Surgical Interventions Annex

CARDIOVASCULAR SURGERY

Surgical cure of varicose veins (crossectomy + stripping)
Surgical cure of hydrostatic varicose veins bilateral chiva method
Surgical cure of hydrostatic varicose veins unilateral chiva method

GENERAL SURGERY

Ablation of voluminous lipoma with IV GA
Ablation of voluminous lipoma with local anesthesia
Abscess
Ablation of foreign body granuloma (large size)
Ablation of foreign body granuloma (small size)
Ablation of medium lipoma with IV GA
Ablation of medium lipoma with local anesthesia
Ablation of subcutaneous cell tissue tumor (sebaceous cyst, small lipoma) with IV GA
Ablation of subcutaneous cell tissue tumor (sebaceous cyst, small lipoma) with local anesthesia
Laparoscopic pelvic adhesiolysis
Appendectomy
Laparoscopic appendectomy
Biopsy of anal canal with IV GA
Laparoscopic cholecystectomy
Surgical cure of bilateral inguinal hernia
Anal dilatation
Drainage of perianal abscess
Excision of anal polyp
Excision of foreign body and direct suture (local anesthesia)
Excision of pigmented nevus
Excision of forearm tumorette
Excision of tumors in gluteal region with general or spinal anesthesia
Excision of verrucas (warts) with local anesthesia
Perianal fistula
Recurrent perianal fistula
Anal fissure
Hemorrhoidectomy
External hemorrhoids
Hydrosadenitis
Breast diagnostic/therapeutic tumorectomy
Bilateral ingrown fingernail
Unilateral ingrown fingernail

ONCOLOGICAL SURGERY

Breast open biopsy
Excision of breast lesions (sectorectomy)

GYNECOLOGY

Cervix biopsy

The discount is applied to the cost of the surgical interventions package that covers:

- Pre-anesthesia checkup performed prior to appointing the surgery (if the surgery no longer takes place, it will be paid).
- Accommodation in Hospital's standard room amounting the number of days predetermined by the Hospital

If choosing the **accommodation in the VIP room**, a cost / night difference will be applied.

The accommodation in the VIP room is possible subject to availability at the time of admission to the Hospital.

- Catering services included in the accommodation price –menu predetermined by the medical team
- Professional fees for the operating team available at that time. (the list is available for the patient at the time of admission)
- Sanitary materials and medicines during the predetermined hospitalization period related to each intervention, within standard limits

Additional accommodation - exceeding the average hospitalization period will be fully paid.

The medical services performed during the entire hospitalization episode will benefit from the discount related to the intervention, and not from the discounts for the provision of the respective services on an outpatient basis according to the subscription.

In case of exceeding the standard values (per intervention episode) of sanitary materials and medicines, they will be fully paid.

The discount for surgical interventions listed above is offered according to the medical services subscription mentioned in the Subscription Annex

Endometer biopsy
Vulva biopsy
Cervix conization
Aspiration curettage of the uterine cavity
Cervix dilatation
Cervix electrocautery-ERAD
Excision of endouterine polyps through hysteroscopy
Extraction and installation of intrauterine device
Diagnostic hysteroscopy
Hysteroscopy with intrauterine intervention
Hysteroscopy with laparoscopically assisted intrauterine intervention
Bilateral laparoscopic removal of ovarian cyst
Unilateral laparoscopic removal of ovarian cyst
Perineum intervention
Marsupialization
Uterine myomectomy through laparoscopy
Polypectomy in the cervix
Hysteroscopic resection of endometrium
Bilateral laparoscopic salpingectomy
Sterilization through laparoscopy
Suture in the cervix (cerclage)
Treatment of Bartholin gland cyst

ENT

Tonsillectomy without adenoidectomy
Bilateral intranasal maxillary antrotomy
Bilateral ethmoidectomy
Nasal polypectomy
Septoplasty
Sphenoidotomy
Turbinectomy (section of nasal cornets)
Adenoid vegetations-polyps (adenoidectomy without tonsillectomy)

ORTHOPEDICS

Knee arthroscopy
Femoral shaft fractures
Metacarpals fractures
Metatarsals fractures
Knee arthroscopic meniscectomy
Bilateral hallux valgus surgery (mounts)
Osteosynthesis, not classified elsewhere

UROLOGY

Adult circumcision

- Special sanitary materials (hernia mesh, implants, stents, intrauterine devices, stappler, bariatric kit, etc.) will be fully paid

- Outsourced medical services will be fully paid (e.g.: analyses sampled in SCUB or transport with the ambulance)

Medical hospitalization where there are no surgical interventions

- for accommodation and meal will be applied the discount related to the subscription for hospitalization services
- medical services performed during the hospitalization episode will benefit from the discount related to the subscription for hospitalization services
- sanitary materials and medicines recommended and used during the hospitalization episode will be fully paid

Settlement of the intervention by the NHIH

- Depending on the contracting conditions of the NHIH, certain interventions may benefit from offers that may be settled.

As the changes to the framework contract used by the HIH of Bucharest are not under the control of REGINA MARIA, request the offer and full details applicable at that time from the Hospital's Admissions Office.

In order to perform certain interventions while benefiting from settlement, the subscriber may have to go through a screening process prior to appointing a surgical intervention.

The classification of a certain surgical intervention among those that may be settled by the HIH is related to REGINA MARIA's commercial policy, which reserves the right to change at any time the list of interventions that may be settled.
